

# ASSIGNMENT 3

## PYTHON PROGRAMMING

Team ID	PNT2022TMID49939
Assignment Date	06 October 2022
Student Name	Mutharasan. S
Student Roll Number	950619106013

### Question1:

Write a python code for blinking LED using Raspberry pi.

### Program Code:

```
Import RPi.GPIO as GPIO  
GPIO.setmode(GPIO.BOARD)  
GPIO.setup(3,GPIO.OUTPUT  
GPIO.output(3, True)
```

## Output:

The screenshot displays a web-based IDE interface. On the left, a code editor shows a Python script named `blinking led.py` with the following code:

```
1 import RPi.GPIO as GPIO
2 GPIO.setmode(GPIO.BOARD)
3 GPIO.setup(3, GPIO.OUT)
4 GPIO.output(3, True)
5
```

On the right, a window titled `mycode.py` displays a diagram of the Raspberry Pi GPIO connectors. The diagram is titled "RPi GPIO connectors:" and shows a grid of 40 pins. The pins are numbered 1 through 40, with their corresponding functions (e.g., 5V, GND, BCM 2, BCM 4, etc.) listed next to them. Below the diagram, there is a terminal window with the prompt `>_REPL`.

At the bottom of the IDE, there is a taskbar with several tabs: "Create with code.html", "Create with code.html", "Create with code.html Canceled", "blinking code.html", and "blinking code.html".

**Question2:**

Write a python code for Traffic Lights using Raspberrry pi.

**Program Code:**

```
from gpiozero import LED
```

```
from time import sleep
```

```
green=LED(8)
```

```
blue=LED(13)
```

```
red=LED(12)
```

```
while True:
```

```
    green.off()
```

```
    red.off()
```

```
    blue.off()
```

```
    sleep(1)
```

```
    green.on()
```

```
    sleep(1)
```

```
    red.off()
```

```
    blue.on()
```

```
    sleep(1)
```

## Output:
